September 8, 2020

We've had a busy summer & we hope you have managed to stay both safe & busy!

We have added two exciting new features to the Full Body Encounter:

- We've created a new Preface section for auto accidents.
- You can now embed any data from our new Full Body Encounter templates using the same methodology you use to design form letters – including all your custom variables. You can use one Encounter OR select any two Encounters (to display initial & final data). And of course, you can spot edit the final report with any data from any Encounter at any level of detail. We've provided a new narrative sample in the latest update (see your README) which you can download right now!

We also have more information about the upcoming check-in app. Here are two screenshots:

Are you downloading updates regularly? HIPAA Security Assessments should be a continuous activity — and so should ECLIPSE updates. A wide variety of changes have made their way into ECLIPSE this summer. And you should be downloading updates at least every two weeks.

Sincerely,

Karen Walters, D.C.
