November 30, 2020

On a recent November weekend at the FCA show in St. Augustine Florida, doctors were able to get their first peek at the upcoming mobile check-in-app, which will be available soon for both Android & iPhones. Once released, your patients will be able to download it directly from the respective online Apple & Google Play stores

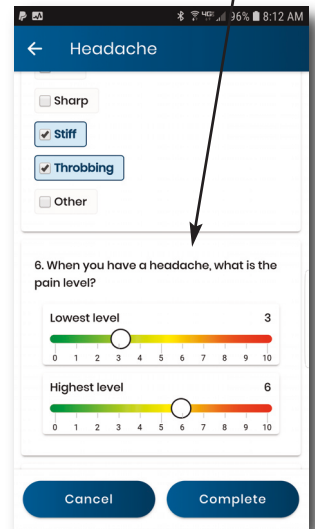

A QR code can be posted in your waiting area & will separately provide automated electronic confirmation of sign-in during the check-in process.

This VAS pain scale is an example of the data entry ease within the app.

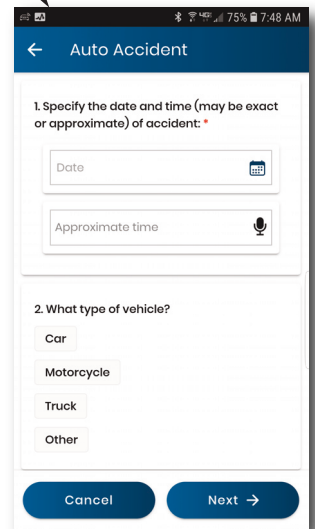

Patients can select one or more areas to initiate a rapid Q/A session regarding subjective symptoms.

The app addresses both Workers Comp & auto accident scenarios.

This past month, we've added configurable payment (e.g. "credit card") & adjustment (e.g. "standard adjustment") defaults, updated the NY WCB OT/PT-4 form, added Encounter features, and added Condition features so you can more easily update the order of ICD codes on a Condition. Download an update & review your README for more details.

Are you downloading updates regularly? HIPAA Security Assessments should be a continuous activity — and so should ECLIPSE updates. A wide variety of changes make their way into ECLIPSE on a continuing basis. And you should be downloading updates at least every two weeks.

Sincerely,
Karen Walters, D.C.
