Mobile App

Development of the mobile app is nearly complete. It's currently going through testing & revision cycles & is still months away from release. Here's how it works:

- You sign up for this [currently free] cloud based service through ECLIPSE. You will also obtain your office's QR code this way.
- Your patients will be able to download the free ECLIPSE Check-In app to their Android or iPhone devices directly from the relevant app store on their phone.
  - Your QR code will be printed & displayed in your office. As patients come in, they can scan the QR code with the new app, enter data, and press the **Submit** button.
- ECLIPSE will retrieve new submissions from our server & display them in the KIOSK grid.
- Simultaneously, an audit entry will be created to indicate the patient signed in electronically directly from their mobile device.
- Patients are matched via their email address or cell phone #, along with their date of birth. You can also select any patient to manually match that patient with the submisson data.
- Double-click a grid entry to launch the patient's folder & either merge data or create a new Encounter.
- The app handles Workers Comp & Auto Accident in addition to standard care scenarios.
- Data is pre-formatted and merged in the Full Body template's subjective free form area. (You can use older templates but will lose the intrinsic formatting (e.g. italics & bold).

HINTS to help you with ECLIPSE

- Have you reviewed the option for creating multiple patient appointments recently? <u>Click here</u> for a 3 minute video.
- Are you certain you know how to best utilize the patient rolodex? <u>Click here</u> for a 5 minute video.
- *• ECLIPSE revisions dated on or after April 21ˢᵗ, 2021 notify you when new updates are available. See your README for details.*

Subscription lapsed? Swap your existing license for a new monthly license. Call us for details! 352.488.0081: Ryan @ ext. 1001. Cathy @ ext. 1014.

Are you downloading updates regularly? HIPAA Security Assessments should be a continuous activity — and so should ECLIPSE updates. A wide variety of changes make their way into ECLIPSE on a continuing basis. And you should be downloading updates at least every two weeks.

Sincerely,

Karen Walters, D.C.
