June 1, 2026

**** 3 Months of FREE ECLIPSE® Subscription ****
**** \$200 NCMIC Statement Credit ****

When it comes to the economics of your practice, accepting credit card payments is the *obvious* choice these days. It's well-established that they improve collection rates, accelerate cash flow & increase treatment options for your patients. So, what could be better than 3 months of your ECLIPSE subscription for free & a statement credit from the company most of you already trust??? *How about what may be the lowest *effective* rate you'll find anywhere with no monthly costs! NCMIC's rate is actually lower than the rates we pay to process your cards — and we process thousands every month!* If you don't currently process credit cards with one of our partners, you're eligible for this deal. [Just click here for details & to get started.](#)

When Was The Last Time You Installed A Windows Update?

ECLIPSE now directly interacts with **Alveo** to export ANSI 837 claims, import 835 remittance, and display claim acknowledgments. Last visit dates are now displayed in the patient rolodex. When patients opt out of SMS text-messaging, a message will be displayed in the **Personal** tab's **Contact Info** pane in *red* beneath the cell phone #: **Opted out of SMS text messaging.**

In ECLIPSE EHR Cloud RIGHT NOW...

We're continuously introducing new features to **ECLIPSE EHR Cloud**. Two recent examples: Solicit patient reviews via our Reputation Management feature... Add Multi Factor Authentication (2026 HIPAA mandate).

Did you know? *Multiple published studies demonstrate the effectiveness of text messaging to reduce missed appointments. ECLIPSE EHR Cloud® helps you automate appointment reminders. Configure multiple reminders to be sent as you create or reschedule an appointment... on a date & time (e.g. 1 day in advance) determined by you... and 1 hour in advance of your patient's scheduled appointment time...*

[Click here](#) to read an article in Medical Economics that explains why you should be using these features right now.
